THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

In the period from January to April 1952, company commanders of the 2 Battalion, 560 Regiment, 187 Division, of the 63 Army, often made the following assertions about the Mukden Army Arsenal,¹ which was believed to be outside the city's east gate:

- The Mukden arsenal was engaged in manufacturing field guns and napalm shells for howitzers to be used at the Korean front in the near future.
- Flame throwers used on the Korean front were manufactured in November 1951 at the Mukden arsenal.
- The 1950 model short machine gun was designed by a Soviet technician and manufactured at the Mukden arsenal. The gun is known as the Ch'ung Feng Ch'iang (5897/6912/2847), and is similar to the Soviet-manufactured sub-machine gun PPSH, except that it has an oblong instead of a round chamber.
